'COT ASSOCIATION ORDERS INCREASE IN FIRST PAYMENT

Short Crop Justifies Raise; Growers Urged To Stand Firm

The opening payment to members of the California Prune and Apricat Growers' Associaton on their 1934 crop will be three cents a pound higher than that paid last year, according to a statement issued last week by officials of the organization.

The increase in price is based on the fact that the 1934 crop of dried apricots will be materially below that of the last three years, and also because apricots sold on a steadily increasing market during 1933 and up to the opening of the 1934 prices. Previous to the word sent out by the association, there had been no quotations made to growers by the packers. The price was decidedly uncertain.

Oficials of the association said:

"While the opening prices in the trade have tended to decline to some extent, due to the propaganda that 'prices were too high, and they might be lower on in the season', present apricot prices are firm, and while buying in Europe is restricted, due to unfavorable trade conditions in Germany, every indication is that the present apricot market can be sustained, and should show some improvement as the season advances."

The statement said that, as near as can be estimated, the fresh apricot crop available for all purposes will not exceed 140,000 tons and that indications are that there will be a definite shortage of the dried product. There is no carry-over.

The statement makes an appeal to growers to stand firm in the face of present efforts to disturb the market in a move to lower prices, and concludes by saying that "Apricot growers should stand firm for the fair price which is justified by the exceedingly short crop. Even a heavy loss in export tonnage will not result in a surplus on the domestic market, as compared with the consumption of recent seasons.

K. FUDENNA SUCCUMBS AT HOSPITAL AFTER FATAL BURNING

Terribly burned early last week when his clothing accidentally took flame Kiichi Fudenna, 53, Warm Springs rancher, succumbed at the San Jose hospital after doctors had made a struggle to save his life.

Fudenna, who was a native of Japan, had lived in California for thirty years. He had been a resident of the Warm Springs district for twenty years, and was highly respected as an excellent farmer.

He is survived by his wife, Mrs. Mahamo Fudenna, and by seven children.

Funeral services, under the direction of the Chapel of Palms, were held at the Fudenna home Thursday morning. Cremation followed at the Oak Hill crematorium in San Jose.

NEWARK LIKELY TO GET TEMPORARY PIPE PLANT

Location of the American Steel and Concrete Pipe Company's plant in Washington township, for construction of the pipe to connect the west portal of the Hetch Hetchy tube with the resevoirs on the penninsula side, was still an undecided question early this week.

Three locations—Niles, Decoto and Newark—have been under consideration of the pipe company officials, with the latter town having the greatest chance because of its central location in regard to the work and because of its proximity to the cheap transportation facilities offered by the bay.

In an effort to have the plant located in the region of Niles, the Niles Chamber of Commerce had arranged for a large site near the Dickey Tile Manufacturing Company plant, which was offered to the pipe concern rent-free.

Some 200 men will be given work at the plant when operations begin. The operations will extend over a period of nine months, it is said.

THREE WOMEN TO BE TRIED FRIDAY ON VAGRANCY COUNT

Alleged to have operated in this district before, three negro women were arrested at San Leandro Thursday after a chase through traffic from Irvington.

Said to have conducted themselves immorally, the three were sought at Irvington after police had received word of their activities. Having a large car, the three women, whose names are Helen Wilson, Billie Farrar and Mae Johnson, left the town before officers arrived.

Lacking complains from those victimized by the women, Judge J. A. Silva will try them on vagrancy charges Friday. Arraignment was on June 29.

Previous plans to hold the trial on Friday the thirteenth, drew such a storm of protest from the three women, that the judge changed the date.

JUNE 29 ALMOST SETS RECORD FOR HEAT

Soaring suddenly from its mild 80 degree mark during the week, the collective township thermometer Friday rose to 94 degrees at 1:30 p. m., which is almost a new record for June 29.

The unprecedented heat, weather men say, was a momentary lapse from oceanic to continental weather, brought on by a weakened pressure off the coast and the folliwng lack of sea-fog.

Apricot growers, complacent in the hope that the season would progress at a leisurely speed, were sent into activity to prepare for an overnight harvest in the event that the heat continued. The weather man obliged, however, and the following days have been milder.

Thousands Throng To Fair; Lions Club Jubilant Over Success

Magnitude of Display Excites Unusual Enthusiasm

FINE ENTERTAINMENT

Sets New Precedent For Rural Displays in County

Reverberations of the smashing success of the first Washington Township Fair will continue to echo along the months until next year's display, greater and still more diversified, takes the eye and enthusiasm of southern Alameda county.

The fair was a success. It was a social, cultural and financial succes. It was something that left many local residents just a little flabbergasted and with a lifted sense of neighborliness.

Centerville's Lion Club, as a group of sturdy workers, can receive no greater reward than the public acclaim. It is the opinion of all who attended the fair, that the Lions' Club with its example of cooperation and tolerance has by this one display, lent more to the unity of Washington township than anything since the turn of the century.

According to Lion officials, expenses contracted by the club in arranging and putting on the fair amounted to $1450. The gross intake from all sources, at the close was approximately $1650. Joe Jason, new Lion president, has voiced his entire satisfaction with the outcome ,and is eager to begin plans for the 1935 fair.

Chick Santos and Allen Norris, originators of the fair idea and tireless workers for its success, are both willing to repeat their labors. Santos under whose direction as executive head the fair materialized also voiced his enthusiasm. Judge Norris tenned the fair a "stupendous success." Frank Madruga, Frank Botelho, W. J. Furtado, Loren Merriott, Harold De Leon, Manuel Almeida, Tony Silva, D. B. Colville, in short every Lion who could be seen was highly pleased.

The Warren Decorating company of Fresno, upon whom the brunt of decorating the display work fell have received the formal thanks of the Lions' Club, as have all who contributed to the success of the venture. The Centerville Boy Scouts, who directed traffic, sold programs, ran errands, and made themselves generally indispensable, will be given a feed and entertainment by the club in the near future.

Industrial displays in the gymnasium were the source of continuous wonderment. "Is that made here?" was a common query even by people who have lived for years in Washington township. In fact the total strangers who dropped in Sunday afternoon seemed much less astonished than many natives.

In booths of prearranged dimensions each display showed a painstaking and artistic arrangement. Each presented something new to the eye.

The entertainment directed by Frank Bristol, was far and away the best that has ever been put on in Washington township. The absence of a stage at first troubled the Lions, but as it later developed, a stage would have ruined the effect. The acts, staged at the east end of the large gymnasium had as a background the great tall sliding doors. Space left clear for the acts was ample, and the final effect was that of a huge amphitheater.

ARTS AND CRAFTS GUILD OUTLINES ORGANIZATION

Meeting Friday evening at the home of Mr. and Mrs. Jack Williamson, the new Arts and Crafts Guild of Washington Township formed the basis of their organization and elected the Rev. Wesley Dexter Gordon as their leader.

The name "Arts and Crafts Guild of Washington Township" was proposed and accepted.

Mrs. Nell F. Myers was named as head of the poetry division of the group and Mrs. E. C. Grau, head of the arts section. Other officers will be named at the next meet, to be held at Mrs. Myers' home on the evening of August 13.

The committee appointed to draft the constitution of the Guild includes: Mrs. Adams, of Irvington, chairman, Mrs. Norman H. Parks and Mrs. Jack Williamson.

The provisional basis of the constitution, submitted by Mr. Gordon, will be used by the committee.

Dr. N. Catherine Holden pending opening of an office in Niles, will conduct business at the Brioza residence north of Niles. Phone Niles 48.—M10tfc.

The dimensions of the old Mission church, built in 1808, were one hundred and twenty-five feet long, and forty feet wide, with walls four feet thick and twenty-four feet high.

FAIR BOOTH GROUP IS COMMENDED BY CHAMBER

All those who had a hand in the arrangement and decoration of the Niles Chamber of Commerce booth at the Washington Township Fair last week-end were this week given formal thanks by the civic group.

The booth, which was designed as a place where visitors at the fair could stop and rest for a while, filled its purpose beyond capacity. It was occupied almost continuously.

Reid Brothers, of Irvington, who furnished the modern furniture with which the booth was supplied; George Erickson, who arranged and painted the cards bearing names of chamber members; Paul Donovan, who designed and painted the township map; and Mr. and Mrs. E. A. Ellsworth, from whose garden came the flowers, were all tendered words of appreciation by the Chamber of Commerce.

SINCLAIR TO SPEAK

Upton Sinclair, widely known educator and economist, and a candidate for the nomination for governor on the Democratic ticket, will fill a series of speaking engagements in the bay regon early in July.

He will speak at Martinez, Friday, July 6; in San Francisco, Monday, July 9, and in Oakland on Tuesday, July 10.

HAIRCUT FAD IS RAMPANT AMONG NILES JUVENILES

MUCH TO THE dismay of Niles barbers and to the pleasure of local phrenologists who take an interest in any display of skull bumps a fad has started among Niles youngsters that bids fair to spread like wildfire. Haircuts—excessively short haircuts—are all rage.

The outstanding feature of this new tonsorial craze is the closeness with which the head is cropped—with a forelock, similar to opportunity's, springing up from the forehead.

It is said that the orignator of the fad is Arnold Bellini. In any event the fad has taken, and provident Niles mothers, realizing the thrifty nature of such juvenile adornment—or lack of it—are quite willing to see their sons shorn.

TOMATO GROWERS TO SEEK INCREASED CROP PRICES

Tomato growers of the Santa Clara Valley will organize this week, it is believed to attempt raising the price of their product above the level of $11.25 with which they have contracted with canners.

The growers have found that due to the rise in prices since the contracts were made, they will be unable to make a reasonable profit during the coming harvest and still pay their laborers at the higher rate.

A petition was circulated among the growers of the San Jose region and arrangements have been made for an organization meet. It is thought that growers of this district will participate.

Founder of Old Press Visitor Here Sunday

E. B. Thompson, of Alameda, who establihed the old Washington Press at Irvington many years ago, and who later purchased the Niles paper and consolidated his with it, was a visitor in Niles Sunday. He called on Norman H. Parks, publisher of the Register. He will be remembered by numerou residents of this district. Thompson who has passed three score and ten, has been retired for many years.

OLD WOODEN FLUME IN NILES CANYON TO BE DISMANTLED

Former Spring Valley Line to San Francisco; Was Built In 1906

Among other historical things to fall beneath the wreckers' bar in Washington township this summer will be the old Spring Valley flume in Niles Canyon, according to word from Frank Rose, who acquired title to the old aqueduct last week.

Rose began dismantling the flume Monday. He states that there are quantities of well preserved lumber in it.

A. W. Ebright, San Francisco Water Department official, who supervised construction of the wooden flume in 1906, said that it was designed to replace the original one which was built in the 80's.

Previous to the construction of the present concrete high pressure aqueduct, laid in 1927, the old wooden flume was one of the main supply lines for San Francisco. It was later used to furnish water to those who had held riperian rights along Alameda creek. It has been in disuse since agout 1929, Ebright stated.

A half mile long and covered, the old wooden flume used to be a favorite promenade and bicycle track for township urchins.

Mosquito District Has Unique Fair Display

Among the many interesting exhibits at the Washington Township Fair was that of the Mosquito Abatement District, which was patterned as a miniature marsh in which the tides ebbed and flowed.

Harold F. Grey and H. B. Van Etten, district officials, were on hand to explain the mechanics of marsh drainage to the spectators.

Made of clay, and realistically ornamented, the display showed how the tides fill depressions in the marsh, then recede to leave pools in which mosquito larvae thrive. In connection with the marsh arrangements, there were displayed tubes of mosquito eggs and larvae in various stages of development.

LEGAL BATTLE MAY OPEN DAM LAKE TO PUBLIC FISHERMAN

Alleged Illegal Netting of Niles Gravel Pit To Stock Lake

A legal battle, the outcome of which may result in the opening of the Calaveras resevoir to public fishing, is pending this week following the alleged illegal seining of the gravel pit holes at Niles one Saturday afternoon recently to obtain fish with which to stock the dam lake. The seiners are said to be employees of the San Francisco Water Department.

According to Lawrence Bunting, gravel company official, by whose efforts and vigilance the gravel pit holes were stocked with bass and maintained as an open fishing ground, the alleged marauders employed nets, an unlawful means in this state, to catch up the small bass and trout fry for transportation to the lake. It is the contention of those interested in the case, that the transferance of fish from an open ground to a closed one automatically opens the latter to public fishing.

The matter is at present being taken up with the district attorney and with the fish and game commission to determine what action will be taken.

Bunting, who stocked the gravel pits with bass hooked by himself a number of years ago, has allowed public fishing in the ponds in season with the restriction that all small fry be returned to the water when caught. He stated that with intelligent supervision, the Niles lakes would someday afford excellent trolling. J. C. Shinn, owner of the property about the lakes, has at no time closed the area to public fishing.

YOUTHFUL BURGLARS TAKEN AFTER CAP PISTOL RAID

Two Niles 12-year-olds, whose names are witheld by authorities, were siezed by police last Thursday night after entering the P. A. Ellis store on J street and stealing a quantity of cap pistols and caps.

Gaining entrance to the place by means of a skeleton key, the boys are said to have turned things topsy-turvy in their quest for suitable booty. They were apprehended by Deputy Sheriff Hugo Radbruch.

P. A. Ellis, store proprietor, did not press charges against the lads, and they were released after a brimestone lecture by Judge Silva. They will be kept under the eye of the police, and any further depredations will result in juvenile charges.

Niles Girl Embarks on Hawaiian Island Trip

Miss Helen Bliss, popular member of the younger set in this district left Saturday evening on the Lurline for the Hawaiian Islands, where he will spend a month vacationing from her work as secretary at the H. P. Garin company plant at Centerville.

Prior to her departure, Miss Bliss was entertained at an afternoon party at the Hotel Richelieu, in San Francisco. Hostess for the occasion was Miss Mary Bliss. There were about twelve guests present to wish the voyager a pleasant trip.

Future of Agriculture Based on Organization

Dear Mr. Parks:

The address made by Alex Johnson, state secretary of the Farm Bureau Federation, at the Farm Center meeting in the Centerville high school Wednesday evening, June 27, seems to me will bear further publicity. While I am not a member of the Farm bureau, and was present at the meeting only as a guest, there was so much in Mr. Johnson's address that was of value to all farmers, that I should like to give a brief resume of it, if I may.

The Farm Bureau is of age, being twenty-one years old. Its history, said Mr. Johnson, is largely written in the more efficient means of production which it has fostered. Not only on the farm in the way of better methods of production at less cost, etc., but in the farm home itself, where it has carried the message of better health, better sanitation, etc.

If the AAA is not satisfactory to the farmers of the country, they have themselves to blame, said Mr. Johnson, as the president gave them a wonderful opportunity to get together on a program. The effect of this was the amalgamation of the plans of the Farm Bureau, the Farmers' Union and the Grange.

Discussing the length of our present depression, Mr. Johnson reminded the farmers that this late war had caused greater dislocation than any other war. The abandonment of some 40,000,000 acres of farming land in continental Europe during the war, and the bringing into cultivation of 40,000,000 acres additional land in this country was at the bottom of our present difficulties. The European countries are gradually bringing back this abandoned land into cultivation, with the result that the extra acres put into cultivation in this country must find readjustment in some form.

The efforts of the present administration to solve this problem was centered in codes, prorate plans, curtailment of crops, moving of sub-marginal farmers, etc.

Mr. Johnson discussed at considerable length the pro-rate plan as applied to California products, the different fruit codes and canning packs, etc. Some of these plans could not be carried out because of competing territory which would not subscribe.

The need for every farmer to belong to some farm organization was never greater than it is today, said Mr. Johnson. The whole future of the farming industry is at stake, and the farmers hold within their own hands whether or not the farming industry shall be put on a par with other industries. Without organization the farmer is helpless, with it he is strong, and Mr. Johnson urged every farmer to join some strong farmer organization. He spoke of the three great farm organizations, and said every farmer should join the one which best suited him, but by all means join one or the other.

It is because I know you to be very much interested in the farmers and their problems, that I have taken this liberty.

(Yours very truly,
ELIZABETH H. SLOAN

Pleasanton Scouts Spend A Week at Yosemite Park

Several members of the Pleasanton Boy Scout troop accompanied by V. Bernard Johnson, scoutmaster, spent a week on a camping trip at Yosemite.

The boys left Pleasanton with their tents and blankets last Monday morning. On that evening they camped at Carl Inn because the road to Yosemite had been closed due to a snow storm which had occurred in that locality, the night before.

The next two days the boys camped at Tuolumne Meadows. There they enjoyed fishing on both days. The boys reported an abundant supply of fish in the water but that they lacked the experience of hooking them. Some of the boys caught trout from thirteen to fourteen inches in length but the average fish caught was about eight inches.

The scouts hiked to Lambert Dome which is over 9,000 feet in elevation. They found hiking very difficult in the high altitude because of thinness of the air. In their hiking they experienced getting short of breath and being tired easily.

On Sunday morning Arthur Potvin, Claude Siggins, Jack Kolln and V. Bernard Johnson, scoutmaster, climbed to the top of the Yosemite falls. They claim that this hike was four and two-tenths miles and that it took them over three hours to complete the hike. The boys had to stop at short intervals to get rested in order to continue their journey.

While at Yosemite the boys camped at the Organizations camp where the group was alone and free from a crowd. They stated it snowed in the mountains on Friday and Wednesday. A number of thunder storms were reported during their stay at Yosemite and that the weather was cold. They saw the fire falls on Saturday evening and watched the bear feed.

The boys returned home Monday morning and reported having made it home from Yosemite in five hours. They had no car trouble on the trip.

The scouts who went were: Clyde Siggins, Arthur Potvin, Donald Graham, Allen Macy, Ernest Moore, Jack Kolln, and Scoutmaster V. Bernard Johnson.

Alameda County Firemen Enjoy Barbecue Thursday

Almost one hundred firemen of Alameda County attended the Alameda County Firemen's Association barbecue held at the McKinley Park at Pleasanton Thursday, acording to word received from Crawford Letham, Pleasanton fire chief.

Fire chief B. J. Rose, of Emeryville, president of the association presided over the affair and introduced the speakers of the evening. The speakers were: Captain Arthur Higgs, who spoke on fire prevention; and William McCoy, Higgs' assistant, who spoke on refrigeration.

A program of entertainment followed the immense barbecue. The barbecue menu consisted of barbecued steak, salad, baked beans and all the trimmings, prepared under the direction of the Pleasanton fire department. The chefs were Ray Martin and M. M. Rodrigues, of Pleasanton.

The fire departments represented were: Albany, Emeryville, Oakland, Alameda, Piedmont, Berkeley, Newark, Mission San Jose, Decoto, Niles, Centerville, San Leandro and Pleasanton.

Keep Ditches Clean

No tile drain is better than its outlet. During the winter months obstructions have accumulated along most ditches. A stump, log, or stick may have lodged across the channel. Grass, weeds and smaller sticks become lodged against such obstructions, forming a dam across the stream. Sediment carried by water will be deposited above such natural dams, submerging any drains that enter the stream near by. Frequent inspection of a ditch will reveal such troubles.

Agricultural Briefs

South Africa expects its 1934 wheat crop to total 3,001,000 bags.

Matron and Patron Party Is Held At Pleasanton Friday

Mr. and Mrs. Hans Hansen, matron and patron of the Pleasanton Order of Eastern Star chapter were honored at a party held at the Odd Fellows' hall, last Friday evening.

All 1934 matrons and patrons of the East Bay were the invited guests of the evening. About one hundred fifty people attended the gathering.

Because Mr. and Mrs. Hansen had celebrated their thirteenth wedding anniversary last week, all the room and table decorations for the affair were carried out in a wedding motif.

A short business meeting was held early in the evening which was followed by a program of entertainment.

The program consisted of several selections by the Pleasanton Women's choral club under the direction of Mrs. E. O. McCormick. They sang "In a Luxemburg Garden," and "O Promise Me," Mrs. Mona Holms, of Livermore, sang "A Little Brown Bird Singing," accompanied by Mrs. McCormick, pianist, Miss Thelma Ferrario, violinist. Those who sang in the choral group were: Miss Mildred Sorensen, Mrs. Bernice Cake, Miss Verna Littlefield, Mrs. Claude Smallwood, Mrs. Velma Ruppel, Miss Thelma Ferrario, Mrs. Sam Elliott, Mrs. Dona Henry, Mrs. Mona Holm and Mrs. McCormick, director.

As a surprise of the evening Anna Marie and Howard Hansen, son and daughter of Mr. and Mrs. Hansen, entered the room drawing a little wagon on which was a large white bell. After each child said a short verse they presented the bell to their mother and father, in behalf of the 1934 officers of the Pleasanton Eastern Star chapter. Under the bell was a coffee table.

Following the program dancing enjoyed. Refreshments were served in the banquet room. At this time distinguished guests were called upon to speak. Of the grand officers present was Mrs. Edith Gibson, of Livermore, deputy grand matron.

The committee in charge of the arrangements for the party was headed by Mrs. Cecile Cope and consisted of Mrs. Walter T. Nilson, Mrs. Sam Glassey, Mrs. Elva Crosby, Mrs. J. W. Sheffield, Miss Mariam Cruikshank, Miss Dagmar Orloff, Mrs. Eleanor Potvin, and Mrs. Mona Holms.

The refreshments committee consisted of Mayor and Mrs. Thomas Orloff and daughter, Dagmar, Mr. and Mrs. Sam Elliott, Mrs. Ella Volponi, and Mr. and Mrs. Ole Olsen.

Brush Dams Last 3 Years; Other Types More Durable

To farmers who would like to know how long temporary check dams built in gullies for control of soil erosion will last, the United States bureau of agricultural engineering supplies information derived from experience.

Check dams made of brush will last from two and one-half to three years. This is time enough for vegetation to grow on the silt accumulated in the gullies and to prevent erosion of the soil.

Pole dams, which are more efficient in catching silt than brush dams, decay fairly rapidly but will last about a year longer than brush dams. After standing up for three or more years, pole dams will sometimes give way during a series of heavy rains.

Time seems to solidify rock dam construction by adding a heavy blanket of silt and grass and similar debris. Rock dams last longer than any other type of temporary check dam.

* * *

More than 550,000 tons of butter was consumed in Germany last year.

* * *

This country produces nearly 90 per cent of the lard that enters world commerce.

* * *

Because of the danger of choking it is usually advised to slice or pulp roots before they are fed to cattle.

* * *

The simplest way to feed salt to cows is to place a block of rock salt in the manger where they can lick it as they choose.

* * *

Grasshopper egg pods contain from 20 to 120 eggs and a single female will deposit about 20 pods. One egg pod per square foot over a field means at least 25 young grasshoppers per square foot.

Phoebe's Oil Stock

By LOUISE RAYMOND

©, by McClure Newspaper Syndicate. WNU Service.

"THERE!" exclaimed John Chambers turning the key in the old lock, "that's over!"

So intent was he on catching the afternoon train to the city that he failed to notice the slim girl coming up just behind him. She sighed because it was, in all probability, the last she would ever see of John Chambers.

Nor did she need the "For Sale" sign which John had just tacked up to know what for days had been town gossip—namely, that the last of the Chambers had rejected the manner of living of his fathers and was going to the city to seek his fortune.

There had never been a love affair between them. Oh, no. An interchange of locks of hair in very early school days, numerous church sociables and picnics shared together—trivial enough bonds, to be sure. And yet—well, there was an ache in Phoebe Holmes' heart.

As the days passed, the sight of the shuttered old Chambers house, fast showing signs of unoccupancy, grew to trouble Phoebe.

The farm, unsold and untenanted, was running down. This fact, coupled with reports which drifted back from the city that John Chambers' fortune was proving elusive and that he was shifting from one job to another, tormented her with a sense of the waste of good material and of her own impotency in the matter.

On a sunny day in late March Phoebe cast a bombshell at the feet of the aunt with whom she lived.

"Aunt Sara," she gave out casually over her cup of tea, "I'm going to spend next week-end in the city. Yes, and furthermore, do you remember those oil stock certificates that Cousin Jenny left me? Well, I'm going to take them along. Who knows, perhaps they're not as worthless as I've thought them. Just suppose—" and her blue eyes grew dreamy, "perhaps they will bring me my fortune!"

Now it happened that several days after this conversation there walked into the outer office of Camby & Camby, brokers, a shabby looking youth with tired lines about his eyes and mouth. A sound of voices from the inner office assured him that his employer was occupied, and sitting down at a dingy desk he rested his head on his hand while his thoughts traveled backward over the discouraging months. Where was he headed? This all but questionable firm could hold no future for him. Little by little, taught by bitter experiences, he was learning how unfitted he was to compete with men trained for their jobs.

Into his meditations crept memories of home, of green fields tilled by his father and his grandfather and his grandfather's father, of substantial barns, of the cheery, homely dwelling. And with those visions arose persistently the picture of a certain slim, blue-eyed person, the playmate of his boyhood, whom, in his feverish pursuit of fortune, he had all but forgotten.

John Chambers sat suddenly upright.

Who in thunder was in the inner office talking with old Camby?

"—yes I had hoped," went on a plaintive voice that awoke in him a sudden tremendous response, "to realize something on this stock. You see, I have a chance to make a splendid investment. I can buy the old Chambers place back home. It is a farm, farmed for generations by men who knew how to husband the resources of the soil. But if these certificates are worthless, as you say—"

A moment later the door opened and John, risen to his feet, met the level, blue-eyed gaze of Phoebe Holmes.

"I—why, why, Phoebe!" was all he managed. Then: "Wait—let me walk a way with you."

For several blocks, through the streaming late afternoon traffic of which neither was aware, they walked silently. Phoebe was the first to speak. "John," she said gently, "the—the bluets are up in the swamp piece. And Dutchman's breeches. Remember how we used to go after them?"

"Do I!" exclaimed John fervently. Then he turned impulsively. "Phoebe!" he cried. "I'm—I'm sick of it all—the hurry, the noise, the crowds. I'm—oh Phoebe. I'm going back home!"

But not until their very wedding day did John learn the real secret of Phoebe's trip to the city. "I can't bear to think," he had chanced to say as they stood for a moment side by side on the clematis-draped porch of the old homestead after a simple ceremony at Phoebe's home, "of you, my darling, traveling about the city trying to get rid of worthless oil stock. You need a husband to keep you from such things."

But Phoebe threw back her pretty head with a merry laugh. "Why, John Chambers!" she cried gayly, "of course I knew they were no good. Only—well, those certificates furnished me with the proper excuse for going to the place I had heard you were employed. You see, if once I saw you, I thought—I hoped—"

"You did!" said her husband and kissed her tenderly.

Camphor Trees Grow High

Camphor trees sometimes grow to a height of 130 feet.

The Spitz Dog

The English spitz was formerly known as the white Pomeranian of England, and the better specimens are pure white, though some are bisque color. They weigh from 25 to 30 pounds. The Eskimo spitz is an entirely different breed, though similar in appearance except that it is larger and has a gentler disposition. No common origin has been traced.

Insurance Actuary's Duties

An insurance actuary is one who figures rates, including mortality tables. From the American mortality table, the actuary makes up the rate to be charged the policyholder for his insurance, and compiles statistics on operating expenses, and the reserve required by law. From these figures, the rates of the individual company are made.

U. S. Secret Service Badges

Members of the United States secret service do not usually wear badges, but carry them. The secret service badge consists of a five-pointed silver star with the letters "U. S." in the center, and the words "Secret Service" around the edge. The badge is struck from coin silver and has fine scroll work in the border.

Marine Insurance First

Marine insurance was the first kind written in the United States. In 1759 the first office was established, although a large amount of individual underwriting had been carried on. This office was in New York and was known as the old insurance office.

"Dam" in Ending of Names

The termination "dam" in many Dutch names literally means "dam." Thus, Amsterdam was originally Amstelle-damm, or the dam of the Amstel river, and Rotterdam means the dam of the River Rotte.

First College to Admit Women

Oberlin college in Ohio, opened in 1833, was the first college in the world to admit women on equal terms with men and the first in the United States to admit negroes on equal terms with whites.

Pronunciation of "Humble"

Dictionaries give the proper pronunciation as "humble," with "h" sounded, adding that the form "umble" was formerly used, but rarely heard now.

Value of Learning

True learning, really acquired and rightly used, tends to make its possessor original by enabling and inducing him to reach farther and to rise higher.

Liberality, Generosity

"To be truly charitable," said Hi Ho, the sage of Chinatown, "it is necessary not only to be liberal with the purse, but generous in our opinions."

Make Lots of Noise

"A banjo player," said Uncle Eben, "don't make much pretension, but he kin stop an argument quicker dan a smart talker."

Midway Islands

The Midway islands are a group of small islands, also called Brooks islands, situated about 1,100 miles northwest of Honolulu.

The Focus

The image of all objects enters the eye upside down; the brain makes the correction and we see things right side up.

Routine Jobs Held Boosting Suicides

Washington.—The ever-increasing suicide rate can be, at least partially, attributed to routine jobs which are unsatisfactory and wearisome, according to Dr. William A. White, professor of psychiatry at George Washington university and superintendent of St. Elizabeth's hospital here.

The dreary side of industrial civilization, he asserts, turns humans into mere cogs in a gigantic machine from which condition they derive no sense of satisfaction.

Doctor White contrasts the pride of workmanship and the sense of fulfillment of the skilled artisan of old and the position of the present-day industrial worker who has no fundamental interest in his work.

He declares that society must change its methods in preparing individuals to meet these new conditions and urges that in the course of his lifetime each individual develop a "vital interest" to keep him going in the face of bitter discouragement.

Guard Against Insects

With the likelihood that market values of many commodities, particularly food crops produced on farms, will rise as a result of the NRA, AAA and other governmental activities, it is more important than ever that such stored products be protected against destructive insects, says M. D. Farrar, research entomologist of the Illinois state natural history survey. In a statement to the extension service of the College of Agriculture, University of Illinois, Farrar points out that it is a quite common experience for insects to be found feeding on stored food products after they have been held in storage a few weeks to several months. Dried beans, peas, apples or fruits of all kinds are particularly susceptible, if stored in a warm place.

Sea and Landscapes New Fingernail Fad

London.—The latest craze in feminine adornment in London started with the painting of miniature seascapes on fingernails. It has since spread to landscapes and miniatures of all descriptions.

A young British painter, Stanley A. Burchett, who was formerly in the Grenadier Guards, started the new fingernail fashion by accident. When painting a garden scene recently, he stopped his work to satisfy a little girl who wanted "a teeny picture for herself."

Burchett quickly painted it on her fingernail. The child's mother was so attracted by the result that she commissioned the painter to decorate her nails. Since then the innovation has spread among stage and society leaders.

Culture

Culture is generally understood to be the sum of all man's progress and achievements and their resulting manners and customs.

Many Stars in Milky Way

It is estimated there are about 30,000,000,000 stars in the Milky Way. The sun is a relatively small star.

New York City's First School

The first school in New York city, then New Amsterdam, was started in 1633.

"Socialism" Very O'd

The term "Socialism" came into use a century ago.

Agricultural Hints

Crop roots cannot penetrate deeply into a soil logged with water.

* * *

New York state plans to provide 35,000,000 trees for planting on waste lands this year.

* * *

The white runner duck, a native of Malay, has a breed history which dates back more than two thousand years.

* * *

Farmers in the north of England are turning from plowing to dairying, and farms of from 50 to 75 acres are in demand.

* * *

Owing to the inelasticity of demand, small crops of potatoes consistently yield larger incomes to farmers than large crops.

* * *

Production credit associations to made short-term loans to farmers have been organized for more than half of the entire country.

* * *

Early oats have proved quite definitely superior to wheat as a companion, or "nurse," crop for alfalfa.

Lake George Is Picturesque

Lake George is one of the most picturesque lakes in the world. It is fed mostly by ice-cold springs, there being less than half a dozen living streams flowing into it. Its length is about 36 miles and it is 346 feet above the sea.

Artificial Silk

The development of artificial silk on an extensive industrial scale began with the discovery of viscose by C. F. Cross and E. J. Bevan in 1892 and certain inventions developed in 1900. By 1910 viscose had a strong start.

Highest Mountain in Europe

Elbrus is a peak in the Caucasus range in European Russia. It is the highest mountain in Europe, with an elevation of 18,468 feet. The Elburz are a mountain range in north Persia, south of the Caspian sea.

An Ancient Volcano

A geologic announcement of interest is that of the discovery of an extinct volcano in the Beartooth mountains in Montana that is thought to be several million years old.

Chinese Cure-all

Ephedrine, discovered a number of years ago, and used widely in nasal preparations, is obtained from a Chinese drug plant used as a cure-all in China for 5,000 years.

Bow and Arrow Experts

The world's greatest archers are the Tarascans, a tribe of Mexican Indians. With their bows and arrows, many of them can split a grain of wheat at 30 feet.

Foot and Hand Movements

When one walks his left hand swings forward while the right foot advances, and his right hand swings forward while his left foot advances.

Depression Hits Santa Monica PELICANS

There's a story that comes out of Southern California. It's about the pelicans of Santa Monica Bay and these pelicans remind us of a lot of us human beings. The experience teaches us that more and better sales effort is required of every last one of us.

For years these pelicans had been fed by fishermen from their surplus catch, until they got the habit of eating without work.

This year high seas changing currents off Santa Monica cut down the catch, and fishermen no longer had any fish to spare. They noticed that the pelicans languished and grew thin and it dawned on them that they had forgotten how to fish for themselves. So they went down the coast and found some unpampered pelicans who had never been ruined by easy living and free fish. They turned them loose among the starving birds, who sat about on the beach and complained of hard times.

The way those imported pelicans went out after their own fish was an eye-opener. Pretty soon the hungry natives quit watching and tried it themselves. They discovered there are plenty of fish in the sea for the bird with energy and enterprise. And they've quit talking about the hard times."

NORMAN H. PARKS
Publisher

Published Every Thursday

Entered as second class matter at the post office at Niles, California, under Act of Congress March 3, 1879.

Determined a Newspaper of General circulation by decree of the Superior Court (Department 6), of Alameda County, California.

Subscription price $2.00 per year.

Widening of Newark-to-Alvarado Road Started

Widening, grading and oiling of the Haley road, between Newark and Alvarado, was started last week after inspection and recommendation of Burnett Hamilton, county engineer.

Work projected on the strip will do away wtih the "bottleneck" at Hall's station, where the road parallels the railroad right-of-way. Previous to the work in progress at the present time, widening of the road was balked by its nearness to the railroad property.

Hamilton, however, has secured an easement from the railroad company so that a shoulder may be laid on the south side of the road.

158 FILE PAPERS FOR ALAMEDA CENTRAL COMMITTEEMEN

Among the 158 politically-minded Alameda county residents who have filed their nomination papers for places on the two county central committees are a number of southern Alameda county people whose names are included in the list of aspirants from the Thirteenth district. They are:

REPUBLICAN—J. F. Angus and Fred Jones San Leandro; W. T. Nightly, R. A. Kolze, Alfred Frager and Frank Arb, Hayward; John J. Amaral Pleasanton; J. A. Schenone, Livenmore; Howard Gleason, Oakland.

DEMOCRATIC—M. E. Neish, J. Meek, S. Kemp and S. Christophy, San Leandro; A. Monahan, T. McGarvin and J. Geary, Hayward; M. Mulqueeny and P. Flanagan, Livermore; Thomas J. Power, Irvington; H. Wallace Sheridan, A. Maura and H. Decker, Oakland.

DAVIS COLLEGE STUDENTS VISIT MEADOWLARK DAIRY

Professor A. Phillips, of the Davis college, and a number of students called at the Meadow Lark dairy on their annual Farm tour last Thursday.

The professor and the boys make an annual tour of visiting various types of farms throughout the state. They visit the dairies, fruit and vegetable ranches, and also cattle ranches.

Proper selection of type, careful composition, and painstaking press work are the foundations of good printing. The Register is justly noted for all three. Let us estimate your next job. Call Niles 23.

Personal Items

Miss Agnes Driscoll was hostess at a small bridge luncheon Thursday afternoon at her home on the Mission road.

Ernest Yarbrough spent one day last week in San Francisco.

Marshall Green and Everett Mendenhall arrived in New York this week. They will visit Green's brother, Harry, while there.

Mr. and Mrs. Howard V. Fournier will drive to Sacramento Saturday. They will spend the week-end there, and perhaps bring Fournier's mother, Mrs. Rose Fournier, back with them. She has spent the last three weeks at the capital city.

Mrs. E. McCarthy, Miss Elsie McCarthy, Mrs. L. Voyer and daughter, Helene, will spend the holiday with Mrs. Rosalie Donovan. Miss Margaret Voyer, who has been vacationing here a week, will return to Oakland with her mother.

A. R. Straub, postman, took up his duties again last week after a forced vacation caused by a wrenched arm.

Billy Rice, 10-year-old nephew of Clarence Crane, spent several days with the Cranes in Niles last week.

Tony Mezza, of Pleasanton, former Niles firemen, atended the firemen's meet here Friday night. He supplied the refreshments.

H. Alsip, of the Shuckl Cannery Company, who has made his home here for a number of years, left Thursday for Sunnyvale, where he will take up his duties at the Shuckl plant there.

E. Dixon Bristow has been making frequet trips into Oakland to see his brother, reported gravely ill at the Merritt hospital.

George C. Roeding was a recent visitor in Sacramento.

Miss Estelle Mae Martinstein is rapidly nearing complete recovery from a recent appendectomy.

Mr. and Mrs. Graham Clapp left for Los Angeles last night. They will remain there several weeks.

Mrs. Lucien Chaix, of San Jose, was a recent visitor in Niles.

Mrs. R. H. Mendenhall is entertaining her father. He arrived from Long Beach recently.

Mrs. Abbie Podd and daughter, are spending the week with Mrs. Theresa Richards. Walter Richards and family visited with Mrs. Richards Sunday.

Mr. and Mrs. Ray Peteron spent Sunday bass fishing in the Crockett-Point Richmond district. They visited with Mr. and Mrs. Leonard Smith in the latter place.

Melvin Teeter is recovering from a minor injury to one hand suffered while working on a drill-press recently.

'TARZAN AND MATE' RATED AS ONE OF BEST MOVIES OUT

Rated by critics as one of the best pieces of entertainment to come to the screen this year, "Tarzan and His Mate," featuring Johnny Weismuller and Maureen O'Sullivan, will begin a three-day run at the Hayward theater tonight. On the same bill is "The Merry Wives of Reno," with Donald Woods and Glenda Farrell.

"Twenty Million Sweethearts" with the Mills Brothers, Ginger Rogers and Dick Powell starts Sunday for three days. Lee Tracy and Gloria Stuart star in "I'll Tell the World," and added attraction. Jean Parker and Tom Brown have the leads in "Two Alone" slated for Wednesday and Thursday, July 11 and 12. "Embarrassing Moments" fills out the bill. Chester Morris and Marian Nixon are the stars.

CHRISTIAN SCIENCE SOCIETY

Subject of sermon for Sunday, July 8, "Sacrament."

Sunday at 11 a. m.

Wednsday at 8 p. m.

Sunday School at 10 a. m.

Reading room is open before and after services.

ALVARADO WEEKLY NEWS

COUPLE FETED

Mr. and Mrs. George Vargas, who returned on Friday from a honeymoon in the north, were given a reception on Saturday evening at the S. D. E. S. hall. The young couple were the recipients of many beautiful wedding presents.

SON BORN

James Perry and Miss Irene Layborne visited at Merritt Hospital with Mrs. Glen Layborne, who recently gave birth to an eight pound boy. Mr. and Mrs. Glen Layborne are former residents of Alvarado.

CANYON PICNIC

Mr. and Mrs. Manuel Rose, Mr. and Mrs. Wilbert Hendricks, Mr. and Mrs. Archie Rose, Antone Santos and Frank Esteves were among those who attended a picnic given by the Sucursal Coimbra No. 4 Da U. P. C. in Stoney Brook park in Niles canyon on Sunday. The Pinto brothers were among the entertainers.

Mr. and Mrs. Joseph Preigo and sons motored to Sacramento over the week end. They visited with Mrs. Preigo's mother.

***

Charles Baird spent the past week abalone fishing at Half Moon bay.

LONE STARS LOSE TO KRAFTILE AT HAYWARD

Recruiting three of their team from bystanders Sunday morning, the Niles Lone Stars took a drubbing at the hands of the Niles Kraftile nine in an impromptu game played at the Bret Harte school diamond at Hayward.

In the absence of all of the regular pitching staff, Joe Machado, team manager, and Arnold Bellini did the hurling for the Lone Stars.

Brown and Lewis, battery for the Kraftile proved effective in holding the Star batters to a few scattered hits. Marshall, Kraftile shortstop, was far and away the best fielder of the day. The final tally was eight to two.

Planned Printing—At Township Register.

HELEN SILVA WEDS FRANK GOULARTE AT ALVARADO

Miss Helen Silva, of Union City road, became the bride of Frank Goularte, of the Alvarado Creek road, at a brilliant wedding in St. Anne's church on Sunday afternoon at 1:30 o'clock.

The bride wore white satin with a train and a veil of tulle and carried a bouquet of white roses. Mrs. Helen Goularte, matron of honor, wore a dress of blue georgette with a hat to match and carried an old fashioned bouquet of pink roses. Joseph Goularte, brother of the groom, was best man.

After the ceremony the relatives and friends of the bride were invited to the home of Mr. and Mrs. Joe Goularte for luncheon.

The couple were indefinite as to where they would go for a honeymoon.

The bride is an employee of the local salt plant. Goularte farms in the Alvarado Creek road.

Mrs. Antone Santos and daughters, Mrs. Mary Davilla and Mrs. Morris Davilla, spent Monday in Oakland.

***

A number of Alvarado people attended the Holy Ghost festival in Santa Cruz on Sunday.

***

Mr. and Mrs. Frank Silva and sons and Mr. and Mrs. Joseph Silva and daughter, Diane, spent Sunday in Golden Gate park. Mrs. Frank Silva's niece, of San Francisco, returned with them to spent a few weeks here.

***

Mrs. Rose Lezand and daughters, Bernice and Elexia, are spending a two weeks' vacation in Santa Cruz with relatives.

***

Mrs. Joe G. Avila, Jack Nobriga, of Hayward, Mr. and Mrs. Joe Edwin Dutra and Miss Madeline Avila spent the week end at "Lowry Lodge" in Brookdale.

***

Mrs. Frank Simas and Miss Emily Simas, of Hughson, are here visiting with Mrs. Helen Lewis for a few weeks. Miss Simas is recuperating from a recent appendicitis operation.

SUNOL -- DEPARTMENT --

PORTLAND TRIP

Mrs. J. H. Rankin and son, George, left on Monday by automobile for a few weeks' trip to Portland, Oregon, and vicinity.

***

PET MISSING

Everyone in Sunol who has become acquainted with Mrs. Lamon's bull dog, "Bully," is mourning because the dog was lost last Saturday afternoon, and has not been found yet.

***

Mr. and Mrs. J. Hoag, of Berkeley, visited Mrs. Hoag on Sunday.

***

Mr. and Mrs. F. Kissinger left Sunday for Oregon, where they will visit with Mrs. Kissinger's grand parents.

***

Mrs. J. Wallace returned to her home in Oakland, after spending two months visiting Mrs. Hoag.

***

***

Robert Bonner, of Eureka, visited his mother, Mrs. Bonner, over the week end.

***

Mr. and Mrs. Faria and Mr. and Mr. Hope, of Livermore, visited Mr. and Mrs. Tony M. Silva on Sunday.

***

Mr. and Mrs. G. O. Heine spent the week end at their home in Sunol.

***

Mrs. Tony King has been in an Oakland hospital since last Thursday.

A SUMMER discount

SAVE 10% —Install Gas Heating this month

THE accepted mode today in house heating is to burn Natural Gas. Natural Gas is the cleanest fuel to use and requires no handling. With modern gas heating equipment Natural Gas burns silently, is controlled mechanically with no labor or care.

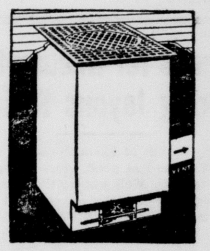
Look over the gas heating devices pictured below. Read how each serves particular heating needs and home conditions. Check them over and decide now to guard against cold weather ills caused by uneven room temperatures. To convince yourself thoroughly, ask your neighbor; he probably enjoys Natural Gas heating.

You owe it to yourself and your family to make the change now to Natural Gas heating, especially while a substantial discount on gas heating equipment is still in effect. Terms could not be more adaptable to your family budget. Let us explain without obligation how easily this permanent home improvement can be accomplished.

You can purchase any one of the gas heating devices shown here this month with a small down payment and at a discount of 10% on both the cost of the equipment and installation, exclusive of flue. Monthly payments are deferred until October 1st. Act now on this Summer Discount and save money.

The Radiantfire

For a cheerful fireplace that always stays clean, install a Radiantfire. Made in many sizes and styles. Beautiful, efficient and inexpensive to buy and operate.



Floor Furnace

Solves the heating problem for homes without a basement. Highly praised by thousands. Saves floor space and is easy and most economical to install and operate.

Thieves Steal Tractor Gas Tank Last Week

There have been numbers of cases recorded where thieves have stripped automobiles, but removing gadgets from farm tractors is a relatively new practice. George Lowrie, Centerville farmer, however, was the victim of just such a theft last Wedneday night.

It seems that Lowrie left his tractor in the orchard overnight, and returned in the morning to find his gas tank gone. A series of footprints around the farm machine may give the authorities some clue as to the identity of the thieves.

Mr. and Mrs. John Fitting, of Alameda, visited with friends in Centerville Saturday evening.

***

Dr. Dan, Peter J. and Henry Crosby attended the Township Fair Saturday night.

CANNED H2O IS BOOTY OF PETTY THIEF AT FAIR

The ways of the transgressor are sometimes silly, it appears, as members of the Centerville Lions club tell of the best joke to arise from the Township Fair.

The joke is on a thief. The one who lifted about eight cans of "canned fruit" from the Pierce Canning Company exhibit.

When the displays were being dismantled Monday, Lion committeemen called the Pierce company and asked them to come and take away their tiers of cans. The company did so, and in counting the cans, it developed that eight were missing. The canning company official smiled at the Lions' discomfiture at having one of their exhibitors robbed, and opened a can.

Water. Just canned water.

There'll be a chagrined petty thief somewhere this week.

GARINTEES WALLOP RAMOS CLUB 9-7 HERE SUNDAY

The Ramos Real Estate team, rated as a dangerous class "B" contender held no terrors for the Centerville Garintees Sunday when the latter outfit hit hard and often to win by a margin of four runs. The score was nine to seven.

Mederios on the mound for the Garin team fanned twelve men and allowed only six scattered hits. In addition to his hurling, Mederios booted out a triple. Silva and Souza each clouted a triple as well. Maciel got a home-run.

Garin box-score:

	A.B.	R.	H.

Beautiful Rites Mark Wedding At Centerville

At a beautifully appointed wedding ceremony Sunday afternoon at the Holy Ghost church Miss Eva Costa, daughter of Manuel E. Costa, of Newark, became the bride of Eugene Silva, also of Newark. The Rev. Father A. De Souza officiated.

The bride wore a striking two piece suit of peach satin and a large picture hat. She carried a huge bouquet of blue delphiniums and small roses. Miss Hazel Matson, bridesmaid, was attired in a peacock blue net dress and wore a small hat. She also carried a bouquet of blue delphiniums. Mrs. Inez Silva played the wedding march.

The groom was attended by Lloyd Bradley, a university classmate.

Immediately following the ceremony, the couple were feted at a reception for relatives at the home of Mrs. Frank Madruga, sister of the bride. There were sixty present.

The couple left Sunday evening on a wedding trip to Lake Tahoe, where they will remain until July 10. They will make their home in Centerville.

Mrs. Silva who is a graduate of Mills College and a talented musician, is a popular member of the younger set in southern Alameda county. Silva, son of Mr. and Mrs. M. D. Silva, of Newark, is a graduate of the University of California. He will be employed here.

Mrs. John Lowman and daughter, June, are spending the week at Rio Nido, on the Russian river. John Lowman joined them yesterday.

J. CASTRO MARRIES CLARA PACHECO MONDAY

Joseph Castro, of Centerville, and Miss Clara Pacheco, member of a well known Half Moon Bay family were united in marriage at a pretty ceremony held at San Mateo Monday morning.

Following the wedding the young couple left for a honeymoon in the Sacramento Valley. They will be gone a week and upon their return Saturday night will be feted at a reception at the I. D. E. S. hall in Half Moon Bay.

Mr. and Mrs. Castro will make their home in Centerville where the groom is employed at the H. P. Garin packing plant.

BETROTHAL TOLD

The coming marriage of Miss Stella Vargas, daughter of Mr. and Mrs. Joseph Vargas, to Joseph Amaral, was revealed this week. The wedding will take place at the Holy Ghost church on July 15.

One of the best hays in the world wild oat hay grew thickly in Washington township up to the period of intense agricultural activity which began with the present century.

In 1890, the state legislature passed the union high school bill, and under its provisions twelve districts in the township united to establish a high school.

Pleasanton Girl To Be Principal At San Ramon School

Miss Thelma Ferrario, daughter of Mr. and Mrs. Ernest Ferrario, of Ruby Hill, Pleasanton, has been appointed principal of the San Ramon grammar school it was announced by the board of trustees of that school district, this week.

Miss Ferrario is well known here having ben reared in Pleasanton. She is a graduate of the Livermore high school, and attended the College of Holy Names in Oakland, where she received her A. B. degree and Music credentials. She attended the University of California for one year where she attained her teaching credentials.

Miss Ferrario is an outstanding character in the community taking part in a number of social performances. She is a member of the Pleasanton Women's Choral club, and has assisted in a number of musical functions with her violin accompaniment.

'Parish Avenue' Signs Adorn Street Corners

Parish avenue—for more than a year a subject for dispute after the Lions Club undertook to post the streets of Centerville, has at last received its name. The signs were put up Mond evening.

Original plans had the street called Allen Way but Mission Peak Drive suited some residents better. Then Parish avenue was suggested and that seemed suitable to all, it is said.

In local parlance, the avenue was called "School Street."

SARAH ESCOBAR WEDS JOHN SMITH AT MILPITAS

Before a group of friends and relatives Miss Sarah Escobar, of Milpitas, became the bride of John Smith, of Warm Springs, Sunday, July 1, at the St. John's church, Milpitas. Rev. Father Silva officiated.

The bride was attired in a long gown of chiffon velvet. She had a long trailing veil which fell from a close-fitting cap. She carried a beautiful bouquet of orange blossoms.

Miss Escobar was attended by her sister-in-law, Mrs. Rosalind Smith, who acted as maid of honor. She wore a long gown of yellow, and also wore a large yellow hat. She carried a bouquet of yellow lillies.

The bride was also attended by four bridesmaids—Miss Madeline Smith, Miss Emily Escobar, Miss Nunes and Miss Silva.

The groom's brother, Alfred Smith, was best man.

Miss Hazel Faria played the wedding march and sang "O Promise Me."

Following the wedding the bride and groom left on their honeymoon trip and will return next Saturday when a reception will be given in their honor.

Joseph Brown, grand president of the I. D. E. S., made an official visit at Los Banos and Livingston Sunday.

Mrs. Antone Briar, Kenneth Briar, Mr. and Mrs. Jack Briar son, Howard, Mr. and Mrs. Costa and son, Howard, Mr. and Mrs. Costa and family and Mary Rodrigues attended the Holy Ghost celebration in Santa Cruz Sunday.

***

Anthony Amaral, of Misson San Joe, visited relatives here Sunday.

Mrs. Dutra and Mrs. Azevedo, of Port Chicago, visited relatives here Monday.

***

Mr. and Mrs. Caton Lawrence, Ernest Lawrence and Mr. and Mrs. Frank Vargas motored to Modesto Tuesday.

***

Mr. and Mrs. Frank Corriea and son, of Santa Cara, visited friends in Warm Springs Wednesday evening.

***

Miss Eva Brazil, of Livermore, spent the week-end with her parents at Warm Springs.

Walter T. Nilson Is Seated At Head Of Pleasanton Lions

Walter T. Nilson, prominetn Pleasanton attorney, was installed as president of the Pleasanton Lions Club at a meeting held at Letham's Tuesday evening of last week.

The ceremonies were simple with no speaker engaged for the evening. Previous plans for the installation had a ladies' night with speakers engaged for the occasion but due to the death of Jerome Arendt, who was organizer of the club, the plans were cancelled.

Thomas H. Silver, past president, installed the officers.

Following the installation reports on the convention which was held at Santa Cruz two weeks ago were given by the delegates, Walter Nilson and Thomas H. Silver.

Thomas H. Silver was presented with a past president's pin. Presentation was made by the newly installed president, W. T. Nilson.

Other officers installed were: Frank Garatti, first vice president; Arthur C. Day, second vice; Crawford Letham, treasurer; J. W. Sheffield, secretary; James Trimingham, tail twister; T. H. Silver, lion tamer; and the two new directors are Dr. Richard Heinz and George Roraback.

Subscribe to the Register—one of the best weeklies in the west. $2.00 a year, $1.00 for six months.

Planned Printing—At Township Register.

Niles Personal Items

The Rev. and Mrs. Wesley Dexter Gordon left Niles early this week for the Valley of the Moon, near Sonoma, where they will remain for several weeks.

Mr. and Mrs. F. V. Jones were hosts to several friends July 4 at their summer home at Paradise Park.

Louis Lewis, Niles laundryman, who has recently recovered from a severe atack of pneumonia, will soon be back at work.

Miss Catherine Johnson, of Oakland, is spending part of her vacation visiting her grandfather, Chris Keller.

Monogram stationery our specialty.

Irvington Register

By ANNA BETTENCOURT

FIESTA BAND

The Night School band of the Washington Union High school participated in the Holy Ghost parade in Santa Cruz. Those taking part in the band from Irvington were Evelyn and Anne Bettencourt, Joseph George and Gordon Pond.

Arthur Amaral, of Brentwood, visited with Irvington friends on Sunday.

***

Mr. and Mrs. Henry Enos and family, of San Jose, visited with Mr. and Mrs. Joe Amaral on Sunday.

DAY AT COAST

Among those who spent Sunday in Santa Cruz were: Adeline Amaral, Margaret Brown, Carrie Silveria, Adeline Harvey, Rosie Marie and Elva Vargas, Dan Rose, Richard Silveria, Mrs. Mary L. Dutra and Mr. and Mrs. Antone Silva.

Mrs. Manuel Gaularte and Mrs. Emily Silva, of Sunnyvale, visited in Irvington on Monday.

***

Joe Amaral, Stella Vargas, Adeline Amaral and Evelyn Bettencourt motored to Oakland Monday. Mr. and Mrs. Johnson and family have returned to Los Angeles after spending some time in Irvington.

***

Mr. and Mrs. Ed Hirsch spent several days in their summer home in Santa Cruz.

***

Miss Adeline Seppi, of Stockton, is visiting with her sister, Mrs. Otto Pariso.

***

Miss Elsie Costa, Irene Muniz and Frank Brown were among those who attended the fair at Centerville Saturday evening.

***

Miss Agnes Raymond, Leona Freitas, Madeline Freitas, LeRoy Raymond and Rudy Freitas motored to Yosemite Sunday.

***

Mrs. M. S. Raymond spent Tuesday in San Leandro.

GEORGIA OBSERVES 200TH ANNIVERSARY

Last of Thirteen Colonies to Be Settled.

Washington.—Georgia has been celebrating its two-hundredth anniversary, and as a birthday memento the Post Office department has issued a special three-cent stamp bearing the portrait of Gen. James Edward Oglethorpe, who landed with his followers at the present site of Savannah, on February 12 or 13, 1733. The latter date has been the generally accepted one.

Georgia and Savannah are dealt with in a bulletin from the National Geographic society quoting a communication from Ralph A. Graves.

"The last of the thirteen original colonies to be settled, Georgia, with an area of more than 59,000 square miles, is the largest state east of the Mississippi," says the bulletin. "In this particular she is truly a nation in herself, exceeding in size the republic of Austria, or Czechoslovakia, Greece, or Portugal, any one of the six Central American republics, or any of the three island republics of the Caribbean. She is larger than England and Wales, or Belgium, the Netherlands, and Denmark combined.

Variety of Products.

"Her situation on the Atlantic seaboard and her diversity of elevation are such that of the nine distinct climate belts to be found in the United States proper, eight are encountered within her bounds, with the result that she grows as great a variety of agricultural products as any state in the Union.

"Georgia's second city and chief port is Savannah. It is exceeded only by metropolitan and bustling Atlanta. It was where Savannah now lies that James Edward Oglethorpe, in, 1733, established the first settlement of the new colony named for his sovereign, George II.

"There was a four-fold purpose actuating the founding of the last of the English colonies in America. The British government was anxious to have a buffer state between the Carolina-Virginia settlements to the north and the hostile Spaniards in Florida, and a 'shock absorber' for possible encroachments of the French from Louisiana. General Oglethorpe, on the other hand, was chiefly interested in affording a place of rehabilitation for thousands of his worthy but impoverished countrymen and a retreat for the unfortunate of other lands who were being persecuted for their religious convictions.

"The early settlers included not only Englishmen, but Scottish Highlanders, German Lutherans (Salzburgers), Portuguese Jews, Swiss, and Piedmontese.

"Like Augusta, Savannah is steeped in tradition, and historical association is the visitor's companion wherever he goes. Here he finds two monuments, the cornerstones of which were laid by Lafayette, one commemorating the Revolutionary hero, Gen. Nathanael Greene, and the other that gallant Polish friend of liberty, Count Casimir Pulaski, who lost his life at the siege of the city in 1779.

Hero of Fort Moultrie.

"Hard by is a third monument, to William Jasper, the hero whose daring exploit in replacing the fallen colors of the Revolutionary forces at Fort Moultrie in the face of a galling fire has thrilled every American schoolboy. Jasper fell at Savannah with Pulaski in the siege of '79.

"It was from this flourishing seaport, 114 years ago, that the Savannah made the first successful transatlantic voyage in the history of steamship navigation, the passage to Liverpool requiring 25 days.

"Three venerable structures in the heart of the Forest City, so named because of the massive, moss-festooned live oaks which line its streets, attract the attention of the historically minded—the Savannah theater, one of the oldest playhouses in America in which practically all the stage stars in the more than a century of its existence have appeared; Christ church, on the site of the original edifice where John Wesley, founder of Methodism, was once a rector and where he is supposed to have established a Sunday school (still in existence) some 50 years before Robert Raikes started his 'first Sunday school in the world' at Gloucester, England; and the third a mellow old house, now the home of a venerable Savannah jurist, in which General Sherman established his headquarters after he had completed his 'march to the sea.'

"While Savannah derives much of its delightful atmosphere from such associations, there is another side to the city which is equally arresting. It is the world's greatest naval stores market and its miles of waterfront accommodate shipping from all parts of the globe, especially vessels which come for cargoes of cotton, turpentine and rosin.

"There is also a manufacturing side to this, the oldest city in the state. One of the most interesting of its industrial establishments is a sugar refinery, the only plant of its kind between New Orleans and Baltimore, and therefore occupying a marketing advantage in an area covering 13 states."

Banking Conducting Continual Research

The American Bankers Association is daily submitting every phase and every department of banking to searching scrutiny and study, says John G. Lonsdale, president of this the world's greatest financial association. The findings of these investigations are made available to the 20,000 members of the organization for their guidance.

"It is a fine tribute to the spirit of cooperation among bankers that it is able to carry on this work," he says. "Bankers from one end of the country to the other are constantly giving freely and unselfishly of their skill and experience so that the association may produce the truly great results that are being accomplished."

Statistical information on national and state banks, savings institutions, trust companies and trust departments, clearing house groups and general banking is prepared after exhaustive inquiry and distributed for the use of all bankers. The organization's investigations have resulted in the passage of beneficial legislation, revision of banking practices and innumerable changes for a stronger and more efficient banking structure. It has set up an educational system through its affiliated American Institute of Banking, where 45,000 ambitious young bank men and women are now availing themselves of the opportunity to advance in the banking field.

"It has been well said that the American Bankers Association, exclusive of the Federal Reserve System, has been the greatest single nation-wide source of stability and improved conditions for banking in the United States," Mr. Lonsdale says.

Monkeys and Fleas

"Some persons imagine," observed a curator, as he tilted back his chair in his office at the Bronx zoo, "that all monkeys swing by their tails and that they are always picking fleas off one another. Nothing is farther from the truth. The fact is that only the monkeys of the New world have prehensile tails, and all of them—those in the cages anyway—are practically free from parasites in captivity. That's because of the dry air and because our keepers groom them every day. Scratching each other is purely a social courtesy. Or, I might say, the willingness to offer a helping hand. The custom of plucking imaginary fleas dates back a good many years, I suspect, but it strikes me as a very pleasant one."—New York World-Telegram.

Guiding Blind Ships

More than half a million ships are guided up and down the Thames every year by the pilots attached to the great Port of London, says the Montreal Herald. Pilots are taken on board vessels to steer them through dangerous reaches and channels, or to take ships in and out of harbor, and while on board they take command. Occasionally a pilot is compelled to take long voyages because the weather makes it impossible for him to board the pilot boat. Some time ago a pilot taking the liner out of Queenstown had to go to New York because he was unable to leave the ship in heavy weather.

KITCHEN CUPBOARD

By NELLIE MAXWELL

"Rise with the lark, and with the lark to bed"
Observes some solemn, sentimental owl;
Maxims like these are very cheaply said;
But ere you make yourself a fool or fowl,
Pray just inquire about his rise and fall,
And whether larks have any beds at all.
—John Godfrey Saxe.

Different Good Things

WHEN preparing a mayonnaise dressing add when serving it a little whipped cream and one or two hard-cooked eggs chopped fine. A little chopped onion with seasoning also adds to the dressing. Serve on plain lettuce as it may be preferred.

Piquant Sandwiches.—Cream together one cream cheese and two tablespoonfuls of peanut butter. Chop one hard-cooked egg very fine, add one chopped sour pickle and a tablespoonful of chopped green pepper, add salt and pepper and spread on buttered bread.

Savory Sandwiches.—Brown in one tablespoonful of oil one-half cupful of blanched almonds. Chop fine, season well with salt, paprika and add two tablespoonfuls of chopped pickles and one tablespoonful of chutney. Spread bread or crackers with cream cheese, or an equal quantity of cottage cheese; sprinkle with the almond mixture.

For a vegetable dinner try:

Carrots and Onions.—The forehanded housewife when the garden carrots were pulled for thinning canned many of the little new vegetables for winter use. Reheat a can of these small carrots and sea-

Narcissa Locked Her Brother Out

By JANE OSBORN

NARCISSA FENWICK was a person of rare enthusiasms. She had been keen about a wide variety of things Once it was thoroughbred dogs, with strong emphasis on police dogs—though the only dog she had ever owned was a nondescript, dun-colored canine that had attached himself to their rambling old suburban house. She became a devotee of the art of Velasquez at one time, though all she could see of his work was from the imperfect reproductions in a few books from the circulating library. Now she was enthusiastic about the short stories of Morgan Dare. Strange enough when Morgan Dare laid his plots in mining and lumber camps, had very little love interest and was regarded by his publishers as having no following among women readers. However, Narcissa honestly admired him. She read everything that Morgan Dare had ever published, and waited impatiently for his next production.

One morning at breakfast her older brother, Edward, happened to be drinking his coffee and eating his buttered toast at the same time that Narcissa was.

"Hello, Cis," commented the elder brother. "I met that Dare fellow last night—guest of honor at the club—ladies' night." Edward paused to drink coffee, and continued: "Odd having him come on ladies' night, too, because the ladies never read him. Fine chap, though."

"You mean Morgan Dare," Narcissa had been saying, and her blue eyes became almost black with energetic disappointment. "Why, I perfectly adore him. I eat him alive—I think you were contemptible not to ask me. And it was ladies' night, and you knew how very enthusiastic I am about Morgan Dare."

"Weren't any children there," commented Edward and then grinned while Narcissa reminded him haughtily that she was twenty. "Why, I mightn't ever have another chance to see him," she said.

Narcissa's eyes snapped fire. Edward knew the depth of her disappointment, though he perhaps did not count on the possibilities of her resentment.

The Fenwick household had been considerably depleted. Two of the brothers, an uncle and an older sister were away from home. Aunt Martha, who kept house, and the servants had rooms at the back of the house. Old Mr. Fenwick was quite deaf. So Narcissa's plan of revenge was bound to work well. Edward had called out to her as he left to tell Aunt Martha he wouldn't be home for dinner. It was then that Narcissa thought of her plan.

As the day advanced she noticed with regret that it would probably be unusually warm and balmy for May. She had hoped for a chill evening, with possible showers and perhaps a spattering of snow.

After her father had gone to his room that evening, after the servants were all in and after good Aunt Martha had gone the rounds to see that the windows were all securely locked and shutters on the downstairs windows all well bolted, Narcissa crept downstairs.

She surveyed the heavy old front door with close scrutiny. It had a special lock, a key to which the elder brother Edward carried. When he was to be out late the bolt was not drawn. Narcissa carefully drew this bolt and then turned another ancient lock at the top of the door. Then she stayed awake until midnight. She heard the late train draw into the station, waited fifteen minutes and then heard steps on the veranda. Edward had come home; he couldn't possibly get in. The garage was locked and he would have to stay out all night or walk to the village with meager chance of finding shelter there. Narcissa dropped off to sleep secure in her revenge. In the morning she would unbolt the door before anyone was up and not confess her guilt until after Edward had aired his grievance to the entire family.

That morning when she drew the lock she peered through the crescent aperture in one of the front shutters to see if her brother were on the front veranda. Instead of one man she saw two. One was asleep in a dilapidated hammock and another, the stranger, in a rickety steamer chair.

That morning she appeared at breakfast smiling serenely. Her revenge had worked better than she had hoped. Edward had apparently brought home a guest and had been put to the embarrassment of lodging on the front porch with him. Served him right. She hoped the guest was some one of importance so that Edward would be really embarrassed.

Edward greeted Narcissa with more than usual enthusiasm, both he and his guest rising as she entered.

"Here he is, Cis," he said. "This is Mr. Morgan Dare. I brought him out for the night, which we spent on the veranda."

There were rather embarrassed handshakings. "I told Mr. Dare how you admired his work, and he asked to meet you. You're the first woman he ever heard of that liked his writing."

So it was. Morgan Dare tarried two days, so charmed was he with the only girl who admired him. And when he went it was with his troth plighted to that of Narcissa Fenwick.

Redwood's Only Rivals

Douglas firs come next to the redwoods in size. They often are more than 250 feet tall, with diameters of 6 or 8 feet.

POULTRY

EGG PRODUCTION DURING SUMMER

Poultry Men Agree That It Depends on Best Care.

Facing poultry men during the summer is the problem of preventing a rapid drop in egg production with the coming of warm weather, when eggs bring good prices. Standard egg production in New Jersey for June is 18 eggs per bird, for July it is 16 eggs, and for August, 13 eggs. Whether or not a flock makes standard production during these three months depends entirely upon the care it is given by the poultry man, announces the poultry department of the New Jersey agricultural experiment station.

According to the station, successful poultry men agree that good summer egg production depends on attention to little details of management and not on one outstanding factor. Culling the flock, for example, is not the most important factor in obtaining standard production, but just one of the many factors. In fact, culling should be last in the effort to hold production.

The laying house should receive attention first, as a means of holding egg production. All windows should be opened to provide good ventilation and to keep the house cool.

Lice and mites are often the cause of the flock falling off in production. Careful inspection of the birds and coop should be made once a month for these parasites. It is considered a good practice to treat the flock for body lice by using sodium fluoride or any lice powder. Generally, one treatment is sufficient for the entire summer. The roost, drop-boards, and nests should be painted with any coal tar product as a means of controlling the mites. When such cannot be obtained, a mixture of kerosene oil and old crank case oil from the tractor or automobile can be used to advantage.

Heavy consumption of mash, so important to heavy production, is obtained in the summer by feeding only 8 or 10 pounds of grain to each 100 birds; keeping mash always before the birds; and keeping the layers confined to the house where they will always be near the mash hoppers.

Other factors found to be important in feeding are: a daily supply of fresh green feed such as dandelions, lawn clippings and weeds from the garden; and a constant supply of fresh, clean cool water.

When production falls below 50 per cent, it is time to start culling, if the foregoing factors mentioned have been carefully followed.

England's First Postal Service Started in 1522

In England there were private posts in the reign of Edward III. Later the name of Sir Brian Tuke, designated "Magister Nunciorum Cursorum sive Postarum," is mentioned and those of Sir William Paget, John Mason and Thomas Randolph occur in connection with postal business. The last of these worthies was known, in 1581, as chief postmaster for England. The office of postmaster for foreign parts was created by James I in 1619 and Matthew de Quester was appointed to the position. The first regular system of internal posts was proclaimed by Charles I in 1635. He commanded that there be "a running post or two, to run night and day between Edinburgh and London, to go thither and come back in six days." In 1644, Edmund Prideaux, a member of the house of commons, was appointed master of the posts, and first established a weekly conveyance of letters into all portions of the nation. A penny post was organized in London and vicinity in 1681, by Robert Murray. Its revenues were annexed to the crown in 1690. A general post for the British colonies was in effect by 1710.

Roger I, count of Thurn, Taxis, and Valsassina, in the second half of the Fifteenth century established a postal system in the Tyrol between Germany and Italy. His son set up another from Brussels to Vienna in 1516 at the request of Emperor Maximillian I. There was a post between Vienna and Nuremberg in 1522, and Charles V, anxious to have news as speedily as possible from distant portions of his states, ordered a permanent riding post from the Netherlands through Liege, Treves, Spire and Rheinhausen, through Wurttemburg, Augsburg and Tyrol to Italy.

Hearing a Pin Drop

"You could hear a pin drop."

I wonder how many people know the accepted origin of this phrase. I learned it quite by accident, while talking with an official at Lloyd's. Many years ago, I was told, it was customary to hold ship auctions at Lloyd's Coffee house on Tower Hill. Instead of a hammer, a pin was thrust into a lighted candle about an inch from the top; and the last bid made before the pin fell out of the melting tallow was accepted.

When this critical stage in the "Candle auctions"—as they were then called—was reached, a deathlike calm came over the assembly, to enable those present "to hear the pin drop."—London Post.

WOULD ALTER OUR FINANCIAL HABITS

By ROME C. STEPHENSON
Former President American Bankers Association.

THE most constructive action that can be taken toward bringing about greater stability in our business life is the development of a more balanced attitude in the minds of all of our people in regard to the *right relationship between saving and spending.* There is more practical, workable economics in the sentence: *Save during prosperity so as to be able to spend during depression:* than in a whole library full of charts and tables and books on political economy.

R. C. STEPHENSON

I do not believe it is an impracticable dream to bring about an era of more intelligent saving and spending on the part of our people. It is not impossible to change the habits of the population. It has been done in many lines. The habits of our people have been improved and the health of the nation promoted in many ways by consistent programs of advertising and education that have brought about better hygienic understanding and practices.

The medical profession has virtually banished the scourge of some diseases by persistent, intelligent campaigns of preventive sanitary measures and inoculations, requiring new understandings, new habits among many millions of our people. Also a large part of this evolution of public health improvement has naturally developed through the intelligent advertising of many products that have to do with bodily care. I refer to the manufacturers and distributers of such things as more healthful shoes, more effective toothbrushes, food products with more wholesome values of nutrition and countless other practical ideas that have become commonplaces of our daily business life,—and that have become a part, too, of the very texture of the personal habits and health of great masses of our people.

If it has been good advertising and good business for so many of our national producers to spend millions of dollars thus to inculcate new habits of personal hygiene and personal care, is it not good business and good advertising for our banking interests to lay similar stress during the next period of prosperity upon better financial habits and customs of our people.

Bankers above all are interested in stable, wholesome business. They have much to gain by a state of sound financial health among the people, and most to lose by epidemics of economic maladies such as have swept the country during the past two years.

Postage Stamps Had to Be Cut or Torn Apart

In the early days of postage stamps no provision was made for separating the individual stamps and it was necessary to cut them as needed. Steps were soon taken to improve this condition and a system of perforating stamps was patented by Henry Archer. Great Britain purchased this patent, and after some improvements began issuing perforated stamps in 1854.

Within a few years most of the larger countries had bought machines or had built them along similar ideas.

Machines for perforating stamps are built on one of two mechanical principles, either operating in a rotary manner with the perforating pins arranged on the rim of a small wheel, or in a vertical direction with the pins on a bar like the teeth of a comb. Either type may be built to perforate single rows of stamps or entire sheets, at one operation.—Chicago Tribune.

Height of Human Agony in Waiting Return of Lost

In Britanny they are always awaiting the return of lost fishermen. Day after day the bereaved ones of their families wait, gazing out over the treacherous waters. Mothers, wives, sweethearts haunt the quays. For them, in the strange absence of their beloved ones, all life is suspended. Bodies without hope or conscious life, almost without souls, they wait upon the piers. Of all the agonies that rack the human heart, such waiting is the cruelest. The uncertainty of hope deferred plunges the heart into a constancy of the bitterest grief. Better far to know the worst than to hope on and on, without even the poignant consolation of knowledge of the dear one's fate. That persistent anxiety and dread paralyzes every healthful activity, destroys the savor of one's food, makes every night a sleepless one and exiles all joy and peace from human souls. The only refuge left such Breton fisherfolk in life is passionate and daily prayer to God for the return of the missing men who went out upon the sea, and who have not returned.—Le Matin (Paris).

Where Poor Live in Big Palaces Built for Rich

The many curious and charming sights of the Free City of Danzig include the tree shaded old streets of the quaintest names, where poor people live in palaces.

Doubtless these stone houses with their striking colored baroque facades, high steps and fishlike gargoyles were built for the merchant princes of the Hanseatic era of the city's great commercial past, but the shawled women and street urchins that work and play about their portals remind one of the Syrian and Greek immigrants who live in the colonial homesteads of Bowling Green in New York city, except that the city authorities of Danzig have insisted on a cleaner appearance of both streets and homes.

Danzig is full of Gothic and Renaissance architecture, for the decoration of the city extended from public buildings to streets of houses, many going back to the Sixteenth century. This is specially true of Frauengasse and Frauentor; entered through an arch like the fortress portal of an ancient city wall, the streets open on both sides amid trees as if they were the private courtyards of royalty.

Varieties of Dogwood

The commonest variety of dogwood in America is the Cornus florida, generally regarded as one of the most beautiful of flowering trees. The white form has a distinctive light yellow-green flower center with four surrounding brachts, one to three inches long. The rose-red form is identical except for the color tint. Altogether there are about eighty species distributed over the temperate zone. Several representatives of the family are found in Mexico and in Peru. In Europe the Cornus sanguinea, with deep red autumn foliage, was a favorite source of arrow shafts in the Middle ages. Even in our time it is wanted for its firm, hard wood, used in intricate inlay work.

Strange Westminster Scene

It is not generally known that there was an English parliament which was opened by an "infant in arms." It was Henry VI's first parliament, notes the Montreal Herald. The infant monarch was led through the crowded streets of London from the Tower to Westminster on the back of a tall horse. After the royal infant had been regaled on a diet of bread and milk he was carried into the House of Lords. Seated on his mother's knee, he took a dignified part in the proceedings. As an old chronicler says: "It was a strange sight, and the first time it was ever so seen in England."

Phonograph Not Direct Idea in Edison's Mind

Edison admitted he was working on another subject when he stumbled on to the principle which made the phonograph possible. He said, "I was engaged upon a machine intended to repeat Morse characters which were recorded on paper by indications that transferred their message to another circuit automatically when passed under a tracing point connected with the circuit-closing apparatus. In manipulating this machine I found that when the cylinder carrying the indented paper was turned with great swiftness it gave off a humming noise from the indentations, resembling that of human talk heard indistinctly. This led me to try fitting a diaphragm to the machine which would receive the sound waves made by my voice when I talked to it, and register them upon an impressionable material placed on the cylinder. I saw at once that the problem of registering the human speech so that it would be repeated by mechanical means as often as might be desired was solved."—Washington Star.

Thinnest Paper Can Be Split Into Three Parts

It is one of the most remarkable properties of that wonderful product, paper, that it can be split into two or even three parts, however thin the sheet. We have seen a leaf of the Illustrated News divided into three parts, or three thin leaves.

One consisted of the surface on which the engravings are printed; another was the side containing the letter press; and a perfectly blank piece on each side was the paper that lay between. Many people who have not seen this done might think it impossible; yet it is not only possible but extremely easy, as we shall show.

Get a piece of plate glass and place on it a sheet of paper; then let the latter be thoroughly soaked. With care and a little dexterity the sheet can be split by the top surface being removed. But the best plan is to paste a piece of cloth or strong paper to each side of the sheet to be split. When dry, violently and without hesitation pull the two pieces asunder, when part of the sheet will be found to have adhered to one and part to the other. Soften the paste in water and the pieces can be easily removed from the cloth.—B. and O. Printer and Stationer.

Diving Beetle Is Also Called the Water Tiger

The Predacious Diving Beetle—Dytiscus, and its larvae is also called the Water Tiger. The beetles themselves hibernate in the muddy bottoms of streams, etc., but come out from time to time. During the summer they are frequently attracted to bright lights. The mature beetles live for a long time. An instance is recorded where one was kept alive for three years and a half, in a glass vessel filled with water and fed morsels of raw meat. The females of these beetles deposit their eggs at random, in the water. Their larvae or grubs are known as Water Tigers on account of their blood-thirstiness. When full-grown the larvae leave the water and burrow into the ground, and make a round cell within which they undergo their transformation. The pupal state lasts three weeks in summer, but the larvae which transform in the autumn, remain in the pupal state all winter. These beetles belong to the largest family of water beetles, nearly three hundred North American species being known.—Montreal Herald.

Paintings From Prison

The Society of Independent Artists, New York, has received a dozen paintings from Clinton prison, Dannemora, an institution better known for riots than artistic production. The paintings are the work of convict-students in the prison's art class.

THE TOWNSHIP REGISTER

The Pioneer Newspaper of Washington Township

The Newark Register

By Miss Patricia Barton

HOME FOR VISIT

J. Ward, of the U. S. Submarine Dolphin, is expected to be in Newark on Tuesday to visit his wife and family until the ship leaves for Alaska on the ninth of this month.

***

Mr. and Mrs. J. Bartnik and daughter, of Newark, spent Sunday in Livermore.

***

Mr. and Mrs. F. Anders and son are planning to leave for a two weeks' stay at Santa Cruz soon.

***

Mr. and Mrs. G. Taylor and family visited Mr. and Mrs. J. Untje, of Mission San Jose, Sunday.

***

The Iberico, a Spanish club from San Leandro, held a picnic and dance in the Newark pavilion grounds Sunday.

HOLY GHOST TO BE HELD OVER THIS WEEK-END

The Newark Holy Ghost celebration will be held over this week-end, July 7, 8 and 9.

Dances will be held on Saturday night and Sunday and Monday afternoons. The dance on Monday will be free for everyone. The High Mass will be celebrated Sunday morning at 10:30. A barbecue at the pavilion will follow the mass on Sunday, and another free barbecue will be held on Monday.

Another Championship Is Aim of J and F's

The Newark baseball team plays Elmhurst next Sunday at Oakland. The game will be the final game in the second half for Elmhurst. Newark has to win Sunday to prevent Elmhurst winning the second half. The team beat Irvington last Sunday by a score of 4 to 1. Joe Pashote and two players, Ornellas and Lazzarine, watched the game and say that if the J. and F.'s win Sunday they are good for another championship.

The Newark Firemen's Ball will be held in the pavilion on July 28.

***

The priest who is to take the Rev. Father Bray's place until Father Bray recovers said the mass on Sunday at Newark. He is secretary to the Archbishop.

***

A Swiss club held a picnic and dance in the Newark pavilion on July 4.

***

Mr. and Mrs. T. Carver and family spent the holiday in Golden Gate Park, San Francisco.

***

Barbara Straub and Bonnie May, of Niles, visited Lucy Dewhurst, of Newark, last Wednesday.

***

Mr. and Mrs. Yockey and family, of Santa Cruz, visited Mr. and Mrs. Cogswell, of Newark, on Friday and Saturday. Their son, William, will spend two weeks with the Cogswells.

NO GAME

The Newark J. and F.'s did not play the Alvarado team last Sunday as was scheduled. Both clubs are one game ahead on the league.

***

WEDDING TRIP

L. Ferera, J. and F. pitcher, was married last Saturday. He and his bride are spending their honeymoon in Los Angeles. They will stay there for one week.

***

HURT IN CRASH

Mrs. Angie Olivera sustained painful but not serious injuries when her car crashed into a fence near the Alviso school on Friday. Mrs. Olivera is at her home here.

***

Swainsons' Beauty Salon. Phone Centerville 117.—10tfc

***

Four of the Newark baseball players have gone to Los Angeles. They were: Harold Dondero, Clarence Soito and Warren and Howard Robinson. They left Saturday night.

***

Mrs. de Knoop and Mrs. de Vries were shopping in Oakland last Tuesday.

***

Mrs. J. Ward and children, of Newark, visited Mr. and Mrs. A. Pederson, of San Francisco, last Wednesday.

***

The Ladies Missionary Society, of the Presbyterian church, met last Tuesday.

NEW ROUTE

Work is progressing at a good pace on the new San Bernardino-Lancaster cut-off. About thirty per cent of the grading is completed.

NILES WINNING STREAK STOPPED AT SAN LEANDRO, 1-0

Niles was stopped in itts winning march Sunday, when after ten straight victories, the C of C's lost to San Leandro in a game that ended with the score of one to nothing. It was far and away one of the best baseball games ever witnesed in the east bay.

Stellar pitching an air-tight defense were easily the outstanding points of the contest.

Watson, Niles pitcher, allowed only five hits, one of them doubtful because of a bad hop. Amaral, San Leandro hurler, was touched nine times by the Niles boys.

Hitting honors for the day went to George Mederios, who led with three for four. Pura, centerfield, followed with two for four.

Tony Duarte and Wes Raso are credited with superb fielding.

A blow that took away considerable Niles fire was suffered in the fifth inning, when Clarence Pine was retired with a minor injury.

Next Sunday at Newark, Niles plans to resume the win streak.

The box score for Niles:

	A.B.	R.	H.
Raso, ss	4	0	0
Pura, cf	4	0	2
Blacow, 3b	3	0	1
Pine, c	2	0	0
Mederios, 1b	4	0	3
T. Duarte, lf	4	0	0
R. Duarte, rf	3	0	1
Cull, 2b	3	0	0
Watson, p	3	0	1
Robello, c	2	0	1

Ernest Yarbrough drove to Clear Lake July 4. He had arranged to meet several friends there.

Catholic Daughters Have Card Party At Pleasanton Tuesday

The card party held at the Parish hall Tuesday evening of last week for the benefit of the Catholic Daughters of Pleasanton, was a success, according to Nel Reimers, regent. of Dublin,

A number of players from Niles, Livermore and Pleasanton attended the gathering.

Those winning honors were: Billy Booras, Mrs. A. Booras, N. Hunter, of Niles; Mr. and Mrs. E. H. Rasmussen and Joseph Smith, of Livermore; Everett Nevin, Eva Flannigan, Ray Guasco, Mrs. W. D. Chace, Mrs. Maryan Andrade, Mrs. Elvira Silva, Mrs. Nel Reimers, all of Pleasanton.

Other honors went to Mrs. M. R. Paulo, Miss Evelyn Bell, George Trimingham, Mrs. T. Rabello, Jr., Mrs. Maryan Andrade, Mrs. Harvey Dickenson, Mrs. Con Nevin, Mrs. N. R. Harris, Louis Rimedi, all of Pleasanton; and Mrs. T. E. Rasmussen, of Livermore; and J. Booras, of Niles.

Those who worked on the committee were: Mrs. Nel Reimers, chairman; Mrs. Ida Rabello, Mrs. Rose George, and Mrs. Mary McDermott.

Former Pleasanton Girl Is Wedded At San Francisco

Friends of Miss Alice Espy, of Oakland, a former resident of Pleasanton, will be pleased to hear of her marriage to William R. Dawson, at ceremonies performed at San Francisco recently.

Miss Espy is the daughter of Mr. and Mrs. Thomas W. Espy, of San Francisco. She attended the grammar school here and is a graduate of the University of California. For the past year she has been teaching at a school in Willows.

Espy lived in Pleasanton for many years. He is construction engineer for the Spring Valley Water company.

Dawson, who is originally of Oakland, has been principal of a school at Willows.

The young couple left for a two week wedding trip to Washington and Oregon.

Miss Espy is well known here and was very popular among the younger set of the community when she lived here.

Pleasanton Takes Part In Parade At Centerville

A large representation from Pleasanton participated in the big parade held in connection with the Washington Township Fair at Centerville Wednesday evening of last week.

Pleasanton turned out the strongest of any of the towns taking part in the parade. It was represented by its drum corp and about fourteen autos of the various business firms and civic organizations of the town.

The Pleasanton division formed at Central avenue and marched down Main street as far as the Rose Garage, counter marched back through Main street and disbanded by the Washington Union high school.

The line of march included in the Pleasanton division was under the direction of John J. Amaral. It included the Pleasanton Lions Club, the drum corp under the direction of Mrs. Roy Stevenson; Junior Chamber of Commerce, F. E. Hartzell, Hagstrom's Food Stores, Bairos & Graham, John J. Amaral of the Amador Valley Service Station, Pleasanton Service Station, Pleasanton Chamber of Commerce, Henry Cook, Fairbanks Beauty Shop, Pleasanton Times, Valley Creamery, and the Pleasanton American Legion Post.
